## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to an image forming apparatus with an image formation condition-producing means, classified in class 358, subclass 401.
  - II. Claims 10-13, drawn to an image forming apparatus with an image synthesizing means, classified in class 358, subclass 450.
  - III. Claims 14-17, drawn to an image processing apparatus with an operating condition storage means, classified in class 358, subclass 523.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as image formation condition-producing means for producing an image indicative of operating conditions of at least one of the reading means, the image processing means and the image formation means.

Invention II has separate utility such as first image processing means for processing image input by an image input means, image producing means for producing a test pattern image used for evaluating a printed image, image synthesizing means for synthesizing the image processed by the first image processing means with the test pattern image, second image processing means for processing a synthesized image obtained by the image synthesizing means. Invention III has separate utility such as an operating condition storage means for storing the operating conditions

indicated by the image produced by the image producing means, along with a plurality of identification codes, identification code input means for inputting an identification code, operating means for searching the operating condition storage means for the operating condition that corresponds to the input and for operating the image processing apparatus in accordance with the operating condition that has been searched for. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Madeleine AV Nguyen whose telephone number is 703 305-4860. The examiner can normally be reached on 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles can be reached on 703 305-4712. The fax phone numbers for the
